Hyderabad

Professional Summary

Data Science undergraduate with strong proficiency in Java, Data Structures, and Algorithms. Experienced in Python for data analysis, Power BI and Tableau for dashboard development, and SQL/NoSQL databases. JLPT N5 certified in Japanese. Strong problem-solving skills with focus on data-driven solutions.

Education

KLEF Deemed to be University *Jul 2023 – May 2027*
BTech Computer Science Engineering - Data Science & Big Data Analytics CGPA: 9.19

Experience

Apollo Pharmacy LTD - Data Analyst Intern *Jun 2026 – Oct 2026*

- Analyzed large-scale pharmacy sales data and identified key customer trends to support strategic business decision-making
- Designed interactive Power BI dashboards tracking 15+ KPIs including revenue, inventory turnover, and customer lifetime value
- Executed ETL pipelines using SQL and Python to clean, validate, and transform structured datasets from multiple sources
- Implemented automated data validation rules reducing errors by 25%

Projects

Apollo Goa Retail Sales Analytics Platform (Data Engineering & ML) [GitHub]

- Built SQL medallion architecture on 7.17M+ transaction records; loaded into Databricks Delta Lake with Prophet forecasting for per-store sales predictions
- Developed store-SKU segmentation (ABC/XYZ + KMeans) and created Power BI dashboard with 30+ visuals plus web dashboard with data lineage documentation
- **Tech:** SQL Server, Python (pandas, scikit-learn), Databricks, Delta Lake, Prophet, Power BI

Zomato BI & Delivery Time Prediction Platform (ML & Power BI) [GitHub]

- Built end-to-end analytics pipeline with dual ML models for delivery-time prediction and customer churn classification
- Created 6-page Power BI dashboard with automated test suite and reproducible pipeline with comprehensive business reporting
- **Tech:** Python (pandas, scikit-learn), SQL (PostgreSQL, SQLite), Power BI, Jupyter

SQL Data Warehouse - Medallion Architecture (Data Engineering) [GitHub]

- Designed SQL Server data warehouse with medallion architecture (bronze/silver/gold) integrating CRM and ERP systems into star schema
- Implemented automated ETL pipelines with stored procedures for data ingestion, cleansing, standardization, and multi-source integration
- **Tech:** SQL Server, T-SQL, Stored Procedures, Star Schema Design

Technical Skills

Languages: Java, Python **DSA:** Arrays, LinkedLists, Trees, Graphs, Sorting, Searching, Dynamic Programming
Web/Frameworks: JDBC, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Databases: MySQL, PostgreSQL, MongoDB **Cloud:** Azure Data Factory, Synapse Analytics, Azure Storage
BI & Tools: Power BI, Tableau, Git, Google Colab, Eclipse IDE, Apache NetBeans

Certifications & Achievements

Certifications: Oracle Cloud Infrastructure 2025 Certified Data Science Professional ○ MongoDB Associate Developer ○ Japanese Language NAT-Test N5 (5Q)

Key Strengths: Fast learner with strong analytical mindset ○ Excellent problem-solving abilities ○ Collaborative team player ○ Passionate about data-driven insights
